## HGE-C01 WHITE

reference for the dial face. Paper white, no ink. Cut on the grey line.

## HGE-C02 NEEDLE YELLOW

reference for the needle. RGB 252 / 184 / 3, hex #FCB803, sampled from the gauge artwork.

100 mm check ruler. Steel rule: 100.0 +/- 0.5 mm is fine. 97 mm means the driver scaled the page.

hardware/cards/hge\_test\_cards\_sheet1.pdf Cards are 100 x 100 mm and fit the pocket of the jig base plate (100.4 mm).

Print both cards on the same printer and paper. Printer ink is not needle lacquer: these cards prove viability, calibration happens on the real gauge.
